## Discover HindlePower's EPIC Battery Cabinet

**NOW AVAILABLE IN  
NEMA 1!!!**

Did you know that HindlePower does more than just battery chargers? For over 10 years, HindlePower has been manufacturing the EPIC Battery Cabinet, a simple and flexible solution that can safely house your DC equipment. Made at our factory in Easton, PA the EPIC Battery Cabinet has a modular design that can easily expand to accommodate your batteries, chargers, distribution, and more! Key benefits include:

- Designed for indoor (NEMA 1) and outdoor (NEMA 3R) applications.
- Seismic Certified to IEEE 693.
- Customizable to fit your specific application requirements.
- 6-8 week lead times on standard builds!
- System integration for a turnkey solution.

Reach out to our Sales Team to discuss your project needs today!

and Q&A

## Need something larger? Check out the EPIC Battery House and Battery Trailer!

Whether you need to house a larger DC system or a mobile system for emergencies, HindlePower can help with our **EPIC Battery Cabinet** and **Battery Trailer**. Each are customizable solutions made to meet your specific requirements.

The EPIC Battery House is a complete dc system all in one house. It is a climate controlled walk in structure that provides additional space to support expanding dc system demand. It is a fully integrated and lower cost alternative to traditional control buildings.

The EPIC Battery Trailer is a utility grade trailer that is custom designed to meet your substation maintenance and emergency power applications. Integrated, tested, and ready to use, these systems are fully equipped with batteries, battery chargers and all associated power equipment.
